2008 Colchester Cuvèe

Essex County's own wine!

In 1997 grape researcher Valentin Blattner approached Euro Nursery in Harrow, Ontario who took on the responsibility of planting over 2800 "Varieties". Over the next five years the vines were selected for their response to potential wine quality, regional climate and weather extremes.

Viewpointe took on the task of completing the selection process. Viewpointe, in conjunction with Niagara College Teaching Winery, produced wines in 2005 from five of the twenty selections. From this grouping, three varieties were selected for further propagation (HG01, HG03, HG04). Colchester Cuvèe is a blend of 40% HG01, 40% HG04 and 20% HG03.

Some interesting things to note.

Generally

- . Downy Mildew and Powdery Mildew resistant (A LOT less spray up to 67% reduction)
- . Short season (Early ripening of wood leading to good winter hardiness)
- . Upright Growth (Less handwork)
- . High must sugars (HG03, HG04)
- . Decent Yield

PREMIER'S AWARD FOR
AGRI-FOOD INNOVATION EXCELLENCE
